OUR CLIENTS

SERVICES & CAPABILITIES

TechHeights is an IT consulting firm providing best-in-class technology solutions for small and medium enterprises and public organizations. We understand that smaller companies and non-conventional organizations often have unfulfilled needs, requiring flexible, cost-effective IT solutions. It is our mission to provide our clients with the same scalable strategies, technical expertise, and technologies normally accessible only to large private enterprises. It is with this commitment and focus that we apply our expertise to ensure the success of our clients' endeavors.

IT Infrastructure Design and Implementation

By thoroughly evaluating clients' current infrastructure needs and future plans, TechHeights will create an integrated system solution tailored to their needs. TechHeights can fulfill all aspects of your solution from concept and design to deployment and configuration to ongoing maintenance and upkeep.

24x7 Remote Monitoring Services

TechHeights offers a subscription-based IT management service, delivering proactive monitoring, notification, Web-based reporting and automated problem resolution to complex IT and Internet infrastructures 24x7. We monitor your mission critical network devices, servers and applications to increase their availability and performance at a fraction of the cost of traditional network and management software, while reducing fire-fighting.

Managed IT Services

The team at TechHeights is a certified and recognized provider of IT services throughout Orange and LA County. Our range of IT services includes design & implementation of network solutions including Router, Switch and Firewall Configuration, Wi-Fi implementation, Office 365 migration, Private Cloud Services and ongoing maintenance on current IT setup. The team at TechHeights understands that technology solutions will change from business to business. We will offer solutions that balance your business's needs, costs and performance. We have a proven record of offering the best in IT services in Orange County and can ensure that all the IT needs of your business are fully met.

Cloud Services

TechHeights provides best in class cloud solutions and services for your business. Our solutions not just focus on cost efficiencies but also infrastructure security, manageability and overall reduced IT overheads. Our services include Desktop-as-a-service, Application-as-a-service, Cloud Servers, Cloud based Email and Calendaring. TechHeights Cloud Services will enable you to focus on your business and respond to fast-changing business conditions. Our Managed Cloud team helps you determine the right Cloud solution that fits your business goals and needs. We have partnered with AWS, VMware and Microsoft Azure to provide secure, agile and robust cloud services for your business.
